

STAMINA®

#5REX

PROFILE

SHOW•RITE® Stamina® is 100% wheat germ oil made from fresh high quality wheat germ. Stamina® is derived from a unique cold process, preserving all of the valuable nutrients and essential factors (including Octacosanol) as they exist in raw wheat germ.

STAMINA®
Brought to you EXCLUSIVELY by HUBBARD®

Show-Rite®

ABOUT THE PRODUCT:

SHOW•RITE® Stamina®

A liquid wheat germ oil that is fortified with vitamins A and D and rich in vitamin E. When fed to show animals, Stamina® will add bloom and sheen to hair coats.

Liquid Form

Designed to be either top dressed at the rate of 1 to 2 oz. per head per day or mixed in complete feeds based on feed intake.

Rich in Vitamin E and Linoleic Acids

Vitamin E helps build the immune system and will help show animals rebound sooner after jackpot shows. Vitamin E is also helpful in making animals free and easy moving. Linoleic acid helps improve hair coat appearance. The fatty oil portion of Stamina® supplies linoleic acid which has been described in animal nutrition as the “skin and coat vitamin.”

Rich in Octacosanol

Octacosanol has been shown to increase the oxygen carrying capability of blood cells. This will in turn help show animals rebound after shows quicker and stay on feed. Octacosanol also helps large muscle groups grow and become larger. Octacosanol also has shown to improve reproductive performance in show animals.
