Acid Detergent Fiber, max	20.0%
Ash, max	12.0%
Calcium, min	0.9%
Calcium, max	1.4%
Phosphorus, min	0.3%
Salt, min	0.4%
Salt, max	0.9%
Selenium, min	0.3 ppm
Vitamin A, min	5,000 IU/LB
Vitamin D, min	500 IU/LB
Vitamin E, min	170 IU/LB

\*This includes not more than 0.9% equivalent protein from non-protein nitrogen.

## ACTIVE DRUG INGREDIENTS

Monensin.....20 G/TON

## PROFILE:

Show-Rite Newco Goat is a highly palatable and digestible feed that promotes rumen stability, avoiding the wide variations in pH that can interfere with fiber digestion and feed intake. It's specifically designed to maximize muscle development and provide an ideal handle while maintaining enough fat cover for the perfect, extra-smooth finish in show goats.

## FEEDING INSTRUCTIONS:

Feed Show-Rite® Newco Goat Grower MON20 continuously as the sole grain ration to non-lactating goats maintained in confinement. A source of good quality hay and constant supply of clean fresh water is also required.

Hubbard does not use "Restricted-use Proteins" in their products and is in compliance with FDA and state requirements regarding the use, handling and storage of "Restricted-use Protein" products.

## INGREDIENTS:

Please refer to the product label/tag for a complete list of ingredients.

## WARNING:

Do not feed to lactating goats.

CAUTION: Do not allow horses or other equines access to formulations containing Monensin. Ingestion of Monensin by equines has been fatal. Do not feed undiluted. Monensin medicated cattle and goat feeds are safe for cattle and goats only. Consumption by unapproved species may result in toxic reactions. Must be thoroughly mixed in feed before use. Do not exceed the levels of Monensin recommended in the feeding directions, as reduced average daily gains may result. Feeding undiluted or mixing errors resulting in high concentrations of Monensin has been fatal to cattle and could be fatal to goats.

Options in a 50-lb bag #80270 or bulk invoice
